

WHY KRYTON?

The World’s Leading
Concrete Waterproofing Solution

The original Crystalline Technology with over 50 years of worldwide experience

KRYTON International Inc. is the inventor of **Krystol Internal Membrane (KIM)** - the world's first and only permanent crystalline waterproofing admixture.

KIM turns concrete into a **permanent waterproof barrier**, shielding structures from water ingress and hydrostatic pressure while significantly extending their lifespan.

Crystalline technology is recommended for all concrete that will be subject to water pressure and can be used in precast, cast-in-place, and shotcrete applications.

How is KRYTON different:

KRYTON technology vs. traditional (membrane) competitors:

more sustainable

more reliable

easy to repair

faster application

cheaper

low risk of human errors

KRYTON technology vs. crystalline competitors:

Best performance

- Self-seals cracks - 40% better than the next competitor
- Reduces shrinkage and cracking - 50% better than the next competitor
- Resists freeze-thaw

100% waterproofing system

- Complete system
- Hydrophyllic (waterproofing), not hydrophobic (dampproofing)

100% protects reinforcing steel

- The only system to pass Hawai'i 10year test

Eco-friendly and LEED-compliant

- Leadership in Energy & Environmental Design
- Environmentally-friendly

At Singapore's iconic Marina Bay Sands, KRYTON's Krystol Internal Membrane (KIM) was used to waterproof over 6,000 cubic meters of concrete in critical below-grade structures.

KRYTON's technology also protects the Crystal Pavilions - luxury floating structures - ensuring long-term durability in a complex, water-exposed environment.

WHO WE ARE

Smart Sealed International London is the exclusive representative and authorized master distributor of KRYTON International Inc. for Eastern Europe and Balkans

Smart Sealed International London spreads out the values and successful approach of KRYTON International Inc. at European level.

We have 10 years of experience implementing KRYTON's SMART CONCRETE® system – design and innovative concrete waterproofing solution. This know-how, together with our engineering expertise, have established Smart Sealed brand as a leading and reliable partner.

Our scope of operations includes an entire technical and engineering support in:

- Concrete repairing of cracks and leaks in concrete structures.
- Improving the durability of concrete floors and pavements by increasing abrasion resistance and reducing dusting.
- Improving the workability and strength of concrete mixes.
- Shotcrete applications to increase the waterproofing and durability.
- Reliable and cost-effective commercial terms for the products of KRYTON.
- Fast and secure deliveries to any location across the Balkans and Eastern Europe.

WHY PARTNER WITH SMART SEALED?

Main benefits for you

- Develop your business among a community of leaders and in an environment of innovation
- Receive unprecedented support to improve your business
- Create exclusive trading conditions and an environment of interaction between economically stable industries for your region
- Contribute to building a culture of green behavior among the leading construction companies and professionals in your region

Joining our distribution network means accessing a world-class brand backed by local expertise and full support. You'll work with technologies trusted to protect landmark projects like the Palm Jumeirah in Dubai - where KRYTON's system ensures durability even below sea level.

Your added value of becoming a member of the Smart Sealed network:

- The system we offer is a complete system
- Attractive return on your investment
- Continuous engineering, technical and marketing support
- Site support in the first project and as required
- Long-term product performance supported by independent tests and global certifications
- Industry-leading 10-year warranties for our products
- Comprehensive product training
- Supervision from a dedicated Key Account Manager
- Prompt deliveries from our local East European logistics hub
- Review and dosage of the mix design
- 3d web calculator for offers and quotations

ADD YOUR LOCATION ON THE MAP

Become a member. Enrich the network with your experience.

Your next steps:

Call us or send us an email to get the ball rolling

You will be assigned a Key Account Manager to guide you throughout the application process

Smart Sealed will evaluate your application and supporting business case

An Agreement is signed as soon as an initial stocking inventory is ordered

Comprehensive Distributor Onboarding training event in your own country

Your Account Manager will support you every step of the way, as you establish and grow your Distributorship

Catch the exclusive membership for your country.
